

Verify in real-time your
Authorized Trading Partners
with no additional IT integration.

Get started now!

CARO provides VRS-enabled trading partners with an automated and reliable method to verify trading partners' ATP status.

Trading Partner authorization in VRS-facilitated interactions

Spherity solves the challenge of **authenticating a trading partner as authorized in DSCSA-regulated Product Verifications** that are facilitated by Verification Router Service (VRS).

CARO is a plug-in for your VRS solution

Life sciences customers are able to add Spherity's credentialing solution, CARO, to their system to facilitate **DSCSA-compliant electronic Product Identifier (PI) message exchange**. No additional IT integration is required.

Interoperability based on the Open Credentialing Initiative (OCI)

Spherity is an **OCI founding member**. With CARO, every trading partner presenting OCI-specified credentials in DSCSA-relevant interactions can be authenticated and authorized.

Legisym as trusted partner for credential management

Legisym, a leading expert in credentialing and license management technology, is Spherity's partner. All CARO users receive **Legisym-issued credentials and associated monitoring services** as part of a **single contract**.

“

Using the Spherity Credentialing Service in combination with SAP's VRS, we are able to increase our level of compliance for DSCSA. There was no technical integration required to get started. All I had to do was sign up with Spherity and tell my VRS that I want to use credentialing.

I can encourage all trading partners under DSCSA adding credentialing to their roadmap for 2023.

Dave Mason - Supply Chain Compliance and Serialization Lead at Novartis

Interaction Monitoring with VRS Report feature

Monitor credentialized VRS interactions, allowing you to be audit-ready with event logs and verification reports.

Legisym-issued Credentials

Obtain your credentials from our fully integrated partner, Legisym. All issued credentials are monitored. Legisym's service is included in CARO.

Counterparty Status

Know instantly whether your trading partner has accepted your credential to allow for fast troubleshooting.

Connect & Explore

If you're looking to level up and run proper live tests with your own DSCSA ATP Credentials being connected to your VRS provider, this test account is the way to go. CARO is compatible with all major VRS providers, including SAP, rfxcel, TraceLink, Systech, Movilitas.Cloud, TrackTraceRX, Optel, and GatewayChecker.

Spherity is a leading provider of Digital Wallets and Credentialing solutions

From the successful completion of an **Authorized Trading Partner (ATP) Credentialing Pilot** in 2020 to **co-founding the Open Credentialing Initiative (OCI)** in early 2021, Spherity has matured its DSCSA compliance solution, CARO, and brought a **production-level interoperable ATP credentialing solution** to the pharmaceutical industry. Besides OCI, Spherity is an active member of the Partnership for DSCSA Governance (PDG) and Healthcare Distribution Alliance (HDA).
